Professional Summary

QA Automation Engineer with hands-on experience in **Selenium WebDriver**, **Core Java**, **TestNG**, **Maven**, and **Cucumber BDD**. Skilled in designing automation scripts, performing functional and regression testing, and collaborating within Agile teams. Demonstrated ability to improve test coverage, reduce manual effort, and deliver high-quality software. Seeking opportunities to contribute in automation-focused projects.

Professional Experience

HCL Technologies (Software Engineer) Aug 2022 – Present | Bengaluru

- Designed and automated test scripts using **Selenium WebDriver with Java** for web applications.
- Developed framework components using **TestNG, Maven**, and **Page Object Model (POM)**.
- Created reusable utilities for waits, screenshots, and browser handling to improve script efficiency.
- Executed **functional**, **regression**, and **end-to-end** test suites; identified defects and logged them in **JIRA**.
- Collaborated with developers, BAs, and Scrum teams to understand user stories and acceptance criteria.
- Participated in **Agile ceremonies** such as stand-ups, sprint planning, and retrospectives.
- Maintained code versioning and branch management using **Git/GitHub**.
- Prepared detailed test execution reports and communicated defect trends to stakeholders.

Skills

- **Programming Languages**: Core Java
- **Automation Tools/Frameworks**: Selenium, Test NG, Junit, Cucumber BDD, Page Object Model (POM) / Page Factory
- **Version Control**: GIT, GIT Hub, Bit Bucket
- **Build Tools**: Maven
- **Personal Skills**: Strong analytical and problem-solving skills, Good communication and collaboration, Quick learner and adaptable

Client: Deutsche Bank

Project: DB Sire – Settlements & Securities (Corporate Banking Domain)
Role: QA Automation Engineer

- Automated critical settlement workflows using **Selenium WebDriver + Java**.
- Implemented BDD framework using **Cucumber**, writing Feature Files, Step Definitions, and Hooks.
- Developed Page Object Model classes using **Page Factory** for UI elements.
- Automated regression test scenarios covering transaction validation, securities settlement, and trade processing.
- Executed regression suites and integrated scripts with **Maven** for build management.
- Reported bugs through **JIRA** and performed re-testing to verify fixes.
- Collaborated with teams for requirement clarifications and defect triaging.

Education

Reva University, Bangalore, Karnataka

Bachelor of Technology in Electronics and Communication Engineering
Year of Graduation: 2022

Aggregate: 80%
